BACK LAPTOPS ON THE GO

Our backup can protect all workstations, including those on the go. Protect sales data, executive laptops, and other mobile data with our centrally managed cloud backup software.

MOBILE APPS DEVELOPMENT

IT'S ALL ABOUT COLLABORATION AND INTERACTION

Through mobile apps, you will be able to increase the interaction with your companies. Promotion and loyalty campaign will be more effective as your customers are well informed through a frequent used app. There are many businesses uses mobile apps to offer rewards to the app subscribers as to encourage the customers to buy more and cross sell their products.

IT'S EFFECTIVE TOOL FOR BRANDING AWARENESS

Mobile app increase visibility to subscribers and it is like constant reminder of your business. The app's icon is always visible on the phone's screen where it creates a feeling of your business is always with them all the time. It gives a business more presence through phone than a browser bookmark. It simplifies your communications to your customer through routine updates of new messages or newsletter. It reduces staff workload, cost of distributing your paper materials and minimize cost of data package making it almost free everytime you send your messages through the internet.

MOBILE APPS DEVELOPMENT

REMEMBER YOU THROUGH ROUTINE NOTIFICATION

In any kind of business, routine notification makes your customers remember you. Mobile apps make it easy as it is just in your control to push through a promotion event in your own app. As direct personal connection tool, mobile apps create the feel or they are the first one to get your messages. When your app is in their phone, your customers are more likely to see your special offers related to your business instantly as compare to any other marketing media.

INCREASE ENGAGEMENT WITH YOUR CUSTOMERS

Marketers in all businesses nail down the best way to make customers more engaged and active for repeat orders. Mobile apps with relevant content will greatly connect customers to businesses they most commonly used and indirectly improve customer retention. Making customers and them know more about your businesses and offers.

MOBILE APPS DEVELOPMENT

MAKE PEOPLE REFER AND TALK MORE ABOUT YOU

People are interested, attracted and talk more about a good app than an advertisement. Your mobile app is just like a virtual retail of your business, when it is useful and served specific purpose, your subscribers will continue will to use it and they will refer them to their friends, one to another.

THE BEST LINK TO SOCIAL MEDIA PLATFORM

Consumers of today's generation spend a lot of time on social media. They read and study the level of advocacy on specific product before they make a purchase decision. With the auto sharing function on mobile app, you can share share your messages to multiple social sites automatically and instantly upon every new post or updates. This will greatly increase social interaction and make your prospective customers discuss more about your product and service. Mobile apps are now a popular tool in generating more business. It enhance collaboration, interaction and engagement with your customers. With a changing way of people reviewing a product, mobile app is worthwhile budget allocation in specific industry.

MOBILE APPS DEVELOPMENT

CONVENIENCE OF DIRECT LAUNCH, OFFLINE & ONLINE

Once a native mobile app is downloaded, it's offline on your phone and it syncs only when there's new update. Therefore, it works faster without rely heavily on the internet speed, where user does not need to launch a web browser which will then go through a URL loading when access to a business website. Due to the access of mobile app is as convenience as just a click, it's more likely user will access it more frequent.

HELPDESK

SITE SUPPORT TELEPHONE

Our helpdesk personal serving as the first point for receiving logs from customer, principal and local support centers through any form of communications. They are highly skilled, trained, dedicated and experienced technical support assistance which able to performed remote troubleshooting through diagnostics techniques and pertinent questions.

In order to determine the best solution based on the issue and details proved by customer, our personnel will gather all the necessary information, analyze it, and take immediate action to restore a system to normal operation. This is a tyoe of support whereby the helpdesk staff will try to resolve the problem via phone. If required, our helpdesk personnel will contact internal software development experts for advice or for remedial actions, thus minimizing any downtime at the customer site. Support from Sunday to Friday include public holiday respond time will be 30 minutes.

HELPDESK

INCIDENT AND CALL MANAGEMENT

We shall provide services to track all logs received from the customers. All logs reported are properly recorded in our helpdesk and support system to ensure the logs are solved within the service level agreement signed.

We will ensure:

- o Incident are properly logged.
- o Incident are properly routed.
- o Incident status is accurately reported.
- o Queue of resolved incidents is visible and reported.
- o Incidents are properly prioritized.
- o Resolution provided meets the requirements.
- o Severity are logged i.e
 - o 3 - low - prevents user to complete their tasks.
 - o 2 - mid - prevents performing critical tasks.
 - o 1 - high - major part of service is unavailable.

HELPDESK

INSTALLATION OF SOFTWARE UPDATES

If requirements for any software update or patches update to be installed, we shall obtain the customer approval and coordinate with our customer for onsite installation. If requires we shall test the uodate on a development environment before we installed the updates on production environment. The installation and configuration works will be done by us and/or the principal.

ON-SITE SERVICES

We shall provide an onsite service, if and only if the technical support engineer has determined that the defect will not be able to be resolved using the online support. The Actual on-site technical support hour are subject to the agreement with the customers during the time of the on-site technical support is requested.

HELPDESK

STATISTICAL ANALYSIS & REPORTING

Our help desk management continuously gathers, consolidates, and analyses all information received from customers and reports to the manager as well as customer support representatives.

Reports can be produced monthly with quarterly summaries. Information in the reports are not limited as the following:

- o Total numbers of incidents.
- o Breakdown of incident at each page.
- o Size of current incident backlog.
- o Number and percentage of major incidents.
- o Mean elapsed time to achieve incident resolution or circulative, broken down by impact code.
- o Percentage of incidents handled within agreed reponse time as defined by SLA's.
- o Number of incidents reopened and as a percentage of the total.
- o Number and percentage of incidents incorrectly assigned.

HELPDESK

- o Number and percentage of incidents incorrectly categorized.
- o Percentage of incidents closed by the service desk without reference to other levels of support.
- o Number and percentage of incidents processed per service desk agent.
- o Number and percentage of incidents resolved remotely, without the need for a visit.
- o Breakdown of incidents by time of day, to help pinpoint peaks and ensure matching of resources.

Our helpdesk will conduct sessions with each service provider group to review performance reports. This is to identify:

- o Process that are working well and need to be reinforced.
- o Patterns related to incidents where support failed to meet targets.
- o Reoccurring incidents where the underlying problem needs to be identified and resolution activities are pursued.
- o Identification of work around solutions that need to be developed until root cause can be corrected.

HELPDESK

FIRST LEVEL SUPPORT

This support level receives inbound request through channels like phone, web forms, email, chat or other means based on the documented agreement with the customer. Our first level support assistant shall support logs, catagorizes, prioritizes, tracks and routes incidents reported by users. Our level 1 support is intended to be the first to acknowledge an incident. Our first level support tracks tickets until successfully resolved. Our first level support will typically escalate to second level support resources if the log cannot be solved.

SECOND LEVEL SUPPORT

These technicians have more experience than first level support technicians and manage incidents raised by the first level or as agreed in documented SLA(Service Level Agreement) timelines. Second level support technicians follow documented processes and workflows provided by customer or high-level support representatives, vendors, products management, etc. They are expected to resolve the issue on site and escalate to the third level support when the documentation is

HELPDESK

insufficient to complete the tasks or do not solve the incident. Second level support usually maintain a Run-Book which which they can use for immediate resolutions. They collaborate with any other support or dependency groups in case the incident has a linkage to other support personnel or outside vendors. Second level support engineers will typically escalate to third level support and follow documented escalation precedures.

THIRD LEVEL SUPPORT

Third level technical experts resolved issues the typical difficult or subtle. Third level engineers participate in mangement, priorituzation, minor enhancements , break fix activities, problem management, stability analysis, etc. These support leaders have specific, deep understanding and expertise in one or two technology platforms (i.e. Oracle database administrator or windows admin). Third level engineers are proactive in nature, identifying problems in advance and looking for continuous service improvement opportunities. The principal's and/or vendors support manager belongs to this level of support.

Jsoft Solution Sdn Bhd

C-2-22, Centum@Oasis Corporate Park,

No 2 Jalan PJU 1A/2 Oasis Damansara,

47301, Petaling Jaya, Selangor

Malaysia.

Dear Krish

I am very pleased with the project you have done, and especially your commitment to providing a quality solution when it meant going the extra mile to do so.

Jsoft Solution Skilled team makes them unique compare to others IT support companies while dealing with any technology.

I can say in term of support they provide a great level of customer services. The service was prompt info was up-front and their respond time is efficient as they respond on time.

I'm looking forward too many future opportunities to work with these guys.

Sincerely,

MY STEAM CLEAN ASIA SDN.BHD.

Sirs,

RE: JANACON TRADING SDN BHD
COMPANY PROFILE

We are very pleased with the project you have done, and especially your commitment to providing a quality solution when it meant going the extra mile to do so.

Jsoft Solution Skilled team makes them unique compare to others IT support companies while dealing with any technology.

We can say in term of support they provide a great level of customer services. The services was prompt info was up-front and their respond time is efficient as they respond on time.

We are looking forward too many future opportunities to work with these guys.

Thank you.

Regards,

Dear Krish

I am very pleased with the project you have done, and especially your commitment to providing a quality solution when it meant going the extra mile to do so.

I have worked with Jsoft Solution on Java project. Our projects are always relatively complex, involving java applications with offline capabilities and stringent synchronization requirements. We have also worked with other suppliers, with mixed results.

I can say in term of support they provide a great level of customer services. The service was prompt info was up-front and their respond time is efficient as they respond on time.

I'm looking forward too many future opportunities to work with these guys.

Sincerely,

I have worked with Jsoft Solution on Java project. Our projects are always relatively complex, involving java applications with offline capabilities and stringent synchronization requirements. We have also worked with other suppliers, with mixed results.

I can say with confidence that Jsoft Solution is the best IT company we have worked with. The programmers working on our projects have all been competent and experienced; but they have also been enthusiastic, dedicated, intelligent and enterprising. Communications have been of very high quality, it is clear that the company understand our need and works hard to deliver.

I'm looking forward too many future opportunities to work with these guys.

Sincerely,

20 AUGUST 2019

Dear Krish,

I just wanted to share a quick note and let you know that you guys at Jsoft Solution do a really good job. I'm glad I decided to work with you. It's really great how easy your websites are to update and manage. I never have any problem at all.

My new site is so much faster and easier to work with than my old site. It used to take me an hour or more to update a page and I would still sometimes screw things up.

Now it's almost like having a designer right here with me. I just choose the page, make the change and click save. It's so simple.

Sincerely

Farah Nadzri
Project Officer
